

Date: 6/10/2024

To: All building occupants

From: Charles Yahara, CEFM, AHERA Program Manager

In accordance with the requirement of the NJ Indoor Air Quality Standard, you are hereby notified that non-friable asbestos removal will take place at the Cape May Technical High School June 15021, 2024.

Efforts will be made to minimize disruptions to school staff and maintain safety for all occupants during the project. These steps will include restricting access to the removal areas and hallways near the work areas, as well as the collection of air samples to assure acceptable air quality while work is occurring.

Asbestos floor tile mastic will be removed from the following locations.

- Room 132B
- Room 116A(D)
- Room 104
- Old Gas Station / Grounds Shop
 - This separate, outside building location, may begin on Friday, June 14th.

If you have any questions, please contact

Charles Yahara at ext 222
